MUGHEES AHMAD

FLUTTER DEVELOPER • FULL-STACK MOBILE & BACKEND ENGINEER • AI-ENABLED SOLUTIONS

3+ YEARS EXPERIENCE

Full-Stack MOBILE + WEB + API

AI/ML ENABLED SOLUTIONS

PROFESSIONAL SUMMARY

Skilled Flutter Developer with 3+ years of professional experience building high-quality, cross-platform mobile applications for iOS and Android. Expert in Dart, GetX state management, RESTful API integration, and JSON data handling, with a strong track record of delivering production-ready apps using clean, maintainable, and scalable code. Broad full-stack experience across React Native, Angular 18+, and C# Web APIs, along with hands-on work in AI-powered features, machine learning integrations, and intelligent automation. Passionate about seamless user experiences, performance optimization, and attention to detail.

WORK EXPERIENCE

Senior Flutter & Full Stack Developer | HBit Technology LLC, Multan, Pakistan (2021 – Present)

- Designed and built robust, high-quality cross-platform mobile applications for iOS and Android using the Flutter framework
- Applied advanced GetX state management for reactive programming, dependency injection, and routing across multiple production apps
- Integrated RESTful APIs, third-party SDKs, cloud services, and payment gateways using Dio and HTTP packages
- Developed and maintained C# ASP.NET Web API backends, and built Angular 18+ admin dashboards for business management and real-time monitoring
- Contributed to AI-powered features, machine learning integrations, and intelligent automation across mobile and web products
- Identified and resolved bugs, optimized app performance, and collaborated with cross-functional teams following Agile/Scrum methodology
- Managed source code, pull requests, and branching strategies using Git and GitHub

KEY PROJECT

Charger App — EV Charging On-Demand Platform

Tech: Flutter, Dart, GetX, C# Web API, Firebase, Google Maps SDK, Angular Admin Dashboard

Full 3-in-1 solution: Customer App, Driver App (Flutter) & Admin Dashboard (Angular) • GetX-based state management & navigation across both mobile apps

Real-time Firebase data for live driver tracking & push notifications • Intelligent nearest-driver auto-assignment logic

- Live map tracking with ETA & full admin monitoring/reporting panel

OTHER PROJECTS

Multiple Flutter apps published on App Store & Google Play (on-demand services, e-commerce, business utilities) •

React Native cross-platform client apps • Angular web portals integrated with C# REST APIs • Secure

authentication, payment gateway integration & cloud deployments
