SUMMARY

Full-stack engineer who has shipped 20+ production platforms in 3+ years — an on-demand EV charging delivery network, a FHIR-based healthcare interoperability system that talks to Epic EHR, a real-money gaming platform with KYC compliance, and a legal e-signature workflow for a funeral services network. Owns features end to end: Flutter/React Native clients, ASP.NET Core or NestJS APIs, and the Angular or Vue dashboards that manage them — real-time, payments and OAuth2 built in.

Flutter · ASP.NET Core · SignalR · Google Maps · Tap Payments

Xomma

Real-time competitive micro-gaming platform — 15-min timed events, live leaderboards, KYC-gated real-money withdrawals. Built the Flutter player app + contributed to the Angular admin/user consoles.

Flutter · GetX · Angular · Stripe/PayPal · OpenIddict

HealthSphere

FHIR interoperability platform — AI-assisted document-to-FHIR pipeline matched against a Master Patient Index, routed via Epic EHR OAuth. Patient/provider Flutter apps with SMART on FHIR device pairing.

Flutter · SMART on FHIR · Epic API · CDS Hooks

Funeral Services Platform

Families submit requests with itemized pricing and sign contracts via DocuSign; volunteers fulfill them from a dedicated app. Built the request domain and volunteer Flutter app end to end.

Flutter · GetX · DocuSign · Stripe
